

IN-BUILDING WIRELESS: YOU HAVE OPTIONS

With 80% of mobile traffic starting and ending in a building, wireless infrastructure is a crucial service just like HVAC, electrical and plumbing.

For employers, reliable in-building cellular connectivity is a way to both improve productivity and to attract and keep talented employees. For property owners, providing reliable in-building connectivity helps retain and attract tenants, and increase the value of their properties. Adding a wireless network will make sure you're ready for 5G – the next generation in wireless – and the coming revolution of the Internet of Things (IoT).

T-Mobile works with enterprises, building owners, tenants, operators and commercial developers across the country to connect them with the highest quality wireless service.

Let us help you achieve a strong signal that is accessible throughout your entire facility by carefully engineering a solution that takes into account the size, shape, building materials, demand, and other relevant aspects of your building—and developing a financing and ownership model that works for you.

TWO IN-BUILDING WIRELESS MODELS	BUILD YOUR OWN COVERAGE (BYOC) MODEL	BYOC HYBRID MODEL
On-Site Wireless Infrastructure	Customer Provided	T-Mobile Provided
Connection Cost	Zero Cost to T-Mobile	Zero Cost to T-Mobile
T-Mobile Licensing Agreement	Required	Required
Power Supplied	Customer Cost	Customer Cost
Carriers Included	T-Mobile	T-Mobile* with option to add other carriers
Wireless Signal Source	T-Mobile Joins*	T-Mobile* with option to add other carriers
Fiber Back-Haul	T-Mobile Cost*	T-Mobile Cost*
Additional Carriers	Customer secures additional carriers to join the system	T-Mobile secures and manages carriers to join the system

*T-Mobile, at no cost to the customer or customer's strategic partner, provides the carrier grade signal source, fiber back-haul, any/all labor, and manages the deployment process.

WHAT DO BUILDING MANAGERS, OPERATORS & ARCHITECTS THINK?

87% AGREED

It's imperative that we have in-building cellular coverage in all areas of our buildings.

84% AGREED

Fitting our buildings with optimal in-building cellular coverage would improve our employee productivity.
