

**With 80% of mobile traffic starting and ending indoors, in-building wireless networks are now as important as water and electricity.**

For building owners, reliable in-building connectivity is a way to increase property values and retention — and a way for companies to both improve productivity and to attract and keep talented employees. In fact, wireless coverage is needed everywhere groups of people gather.

**T-MOBILE HELPS BUILD INDOOR WIRELESS NETWORKS FOR:**

- ARENAS / STADIUMS
- CASINOS
- COMMERCIAL REAL ESTATE
- GOVERNMENT BUILDINGS
- HOSPITALS
- HOTELS
- MALLS
- MILITARY FACILITIES
- RESORTS
- RESIDENTIAL BUILDINGS
- UNIVERSITY CAMPUSES
- WAREHOUSES

**BUILD YOUR OWN COVERAGE (BYOC) WITH T-MOBILE**

Make sure your building is ready for the future. Work with T-Mobile to create a custom in-building cellular solution and experience outstanding cellular coverage — even when your building is at its most crowded.

**ALL OUR BYOC PROJECTS FOLLOW THESE THREE TENANTS:**

Property operators invest in their own infrastructural at their sole cost.

Property operator agrees to contribute house power, and not charge T-Mobile a one-time or reoccurring capital contribution, monthly or other operating expense.

T-Mobile provides signal source and fiber back-haul at our sole cost.

Contact us at [BYOC@T-Mobile.com](mailto:BYOC@T-Mobile.com)

**BYOC STEP-BY-STEP**

*We reserve the right to adjust quoted processing times above and that may vary by market and project.*
